

Science Fair Camp

Dear Parents,

Science Fair is one the biggest events of the year.¹ To get your child a head start on next year's Science Project, Jon Sikora, one of our Middle School Science teachers, is holding a fun and energized Science Fair Camp.

The course is designed to help each student decide on a project idea, learn the scientific method and understand the required science. Our goal is to help each student produce a detailed research plan, and in the process, to inspire excitement about science.

Two sessions are scheduled this summer and enrollment will be limited. Please send the attached form with a check made to The Walker School for \$170. If you have any questions, please call or e-mail Jon Sikora (770-427-2689 extension 3521; sikoraj@thewalkerschool.org).

Session I

Science Fair Camp for rising 6th grade students

June 9 – 13, 2008

8:30 A.M. – 12:30 pm

Cost \$170

Student's Name

Parent Signature

Session II

Science Fair Camp for rising 6th grade students

July 7 – 11, 2008

8:30 A.M. – 12:30 pm

Cost \$170

Student's Name

Parent Signature

1. This year 6th grade projects will be used to teach the scientific method. 6th Graders will be given an option of choosing one of three science fair projects agreed upon by the Walker Science Department. The data for each of the three projects will be developed by the entire 6th grade in class. Students will complete their own 16-20 page report upon project completion. If you or your student desire to have the project judged formally in the Georgia State Science Fair, we will offer an option to pick a unique project on the first day of camp. Approval for the project must be granted by the parent and the Walker Science Department.
